Publishing Office: Pergamon Press plc, Journals Production Unit, Hennock Road, Marsh Barton, Exeter, Devon EX2 8NE, England (*Tel.* Exeter (0392) 51558; *Telex* 42749)

Subscription and Advertising Offices: Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England (*Tel.* Oxford (0865) 64881); Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, USA

Published Quarterly

Annual Subscription Rates (1990): Annual institutional subscription rate (1990) DM 295.00; 2-year institutional rate (1990/91) DM 560.50; personal subscription rate for those whose library subscribes at the regular rate (1990) DM 150.00. Members of BIBRA may order personal subscriptions at a concessional rate. Details of these rates are available on request. Prices are subject to amendment without notice. Note: frequency increasing to 6 issues per annum in 1990.

Back Issues

Back issues of all previously published volumes, in both hard copy and in microform are available direct from Pergamon Press offices.

Index of Subjects

2-Acetylaminofluorene interspecies variation in hepatocyte activation of 45
Aldicarb and inhibition of rat plasma cholinesterase 91
Aliphatic compounds chlorinated, correlation between *in vivo* and *in vitro* toxicity 145
Amines and neuroendocrine lung cancer 37
Amoxapine effects in three systems *in vitro* 285
Antidepressants effects of amoxapine in three systems *in vitro* 285
Antihypertensives and haemolysis in human erythrocytes 299
Antioxidants effects of copper sulphate on phorbol ester in mouse skin cells 293

Benzo[*a*]pyrene DNA adducts in mouse and human skin 69 ... sister chromatid exchanges induced by, modulation by indoles 207
Bladder rat, cytotoxicity of saccharin in 201
Brain rat, effects of organophosphorus and carbamate pesticides on 111, 123

Cadmium effects on microfilaments 277 ... interaction with rat testicular cells 215
Calcium regulation of protein phosphorylation in rat glia, effect of toluene treatment 235
Calmodulin modulation of cadmium injury to microtubules 227
Carbamate pesticides and inhibition of rat plasma cholinesterase 91 ... effects on cholinesterase activity in rat brain 111, 123
Carbofuran and inhibition of rat plasma cholinesterase 91
Carbon tetrachloride action in rat liver slices 59 ... in embryonic development 271
Cell-cycle in mammalian cells, effects of paraquat and diquat 53
Chlorinated hydrocarbons action in rat liver slices 59
Cholinesterase in neural cells from rat brain, effects of pesticides on 111 ... in rat plasma, inhibition by carbamate pesticides 91
Chromosome damage benzo[*a*]pyrene-induced sister chromatid exchanges, modulation by indoles 207 ... by paraquat and diquat in mammalian cells 53 ... sister chromatid exchange in human bronchial epithelial cells exposed to carcinogen 21
Collagen synthesis in rat lung interstitial fibroblasts, effect of propranolol on 129 ... uptake of *N*-phenyl-*p*-phenylenediamine 323
Copper sulphate antioxidant effects on phorbol ester in mouse skin cells 293
Crystal violet staining method in cytotoxicity testing 317
Cytotoxicity of chemicals in Hep G2 cell cultures 189 ... of fly-ash in rat alveolar macrophages 95 ... of free radicals in human fibroblasts 103 ... of injection drugs in HeLa cell/neutral red assay 335 ... of saccharin in rat bladder epithelial cell line 201 ... testing with crystal violet staining using microtitre plates 317

Deoxynivalenol effects on MTT cleavage activity of monolayer cells 311
Developmental toxicology meeting report 241
Diabetes whole rat embryo culture in type-1 serum 221
1,3-Diaminobenzene *in vitro*/*in vivo* metabolism 167
1,2-Dichloroethane action in rat liver slices 59
Diet effect on protein synthesis in isolated rat liver cells 7
Diquat genotoxic effects in mammalian cells 53
DNA inhibition of synthesis by paracetamol 13
Draize test use of rabbit cornea cells as an alternative 329
Drugs effects on membrane-stabilizing activity in erythrocytes 1 ... effects on membrane stabilizing activity in protozoans 181 ... injection, cytotoxicity with crystal violet staining method 317 ... injection, irritancy in HeLa cell/neutral red cytotoxicity assay 335

Embryo chick, effect of carbon tetrachloride on 271 ... rat, effect of carbon tetrachloride on 271 ... rat, identification of cytochrome *P*-450 in 245 ... rat, inducibility of cytochrome *P*-450 in 253 ... whole rat, culture in type-1 diabetic serum 221
Enzymes cytochrome *P*-450 identification in rat embryo 245 ... cytochrome *P*-450, inducibility in rat embryo 253
Erythrocytes human, haemolysis after treatment with an antihypertensive 299 ... membrane-stabilizing activity of drugs 1
Ethanol effects on liver protein synthesis 7
Eye irritation, use of rabbit cornea cells to replace Draize test 329

Fibroblasts human foreskin, cytotoxicity of free radicals in 103
Fly-ash cytotoxicity in rat alveolar macrophages 95
Free radicals cytotoxicity in human fibroblasts 103

Genotoxicity of haloalkene and haloalkane glutathione *S*-conjugates in porcine kidney cells 151 ... of paraquat and diquat in mammalian cells 53
Glia rat, calcium-regulated protein phosphorylation in, and toluene treatment 235
Glutathione conjugates with haloalkenes and haloalkanes, genotoxicity in porcine kidney cells 151
Gut effects of saponins on mammalian small intestine 85

Haemolysis in human erythrocytes treated with an antihypertensive 299
Heart guinea-pig, effects of amoxapine on 285 ... isolated rat, cardiotoxicity of vancomycin in 27
Hormones testosterone, effects of PCBs on 33
Hydrocarbons chlorinated aliphatic, toxicity of combinations of in rat hepatocytes, and *in vivo* 137

Immunocytochemistry in identification of cytochrome *P*-450 in rat embryo 245
Indoles modulating effects on benzo[*a*]pyrene-induced sister chromatid exchanges 207
Irritancy screening method for injection 335 ... testing, meeting report 157
Kidney evaluation of nephrotoxins in rabbit renal slices 341 ... mammalian, effects of mycotoxins on MTT cleavage activity in 311 ... porcine cells, genotoxicity of haloalkene and haloalkane gluthathione *S*-conjugates in 151 ... rat, primary cortex cells for nephrotoxicity studies 261

Liver hepatocyte activation of 2-acetylaminofluorene, interspecies variation 45 ... protein content in Hep G2 cells as indicator of cytotoxicity 189 ... rat, metabolites of 1,3-diaminobenzene formed in perfused liver, hepatocytes and whole rat, 167 ... rat, protein synthesis in isolated cells 7 ... slices from rat, action of chlorinated hydrocarbons in 59 ... toxicity of combinations of chlorinated aliphatic hydrocarbons in rat hepatocytes 137
Lung, bovine embryonic, effects of mycotoxins on MTT cleavage activity in 311 ... cytotoxicity of fly-ash in rat alveolar macrophages 95 ... neuroendocrine cancer, effects of amines and nitrosamines 37 ... rat, effect of propranolol on collagen synthesis in interstitial fibroblasts 129 ... sister chromatid exchange in human bronchial epithelial cells exposed to carcinogen 21 ... V79 cells, Chinese hamster: inhibition of DNA synthesis by paracetamol in 13

Meeting report irritancy testing 157 . . . neurotoxicology *in vitro* 159 . . . quantitative structure–activity relationships 351 . . . reproductive and developmental toxicology 241
Membrane stabilizing activity of drugs 181
Metabolism of 1,3-diaminobenzene *in vitro*/*in vivo* 167 . . . in Sertoli cell cultures, effects of phthalate monoesters on 77
Microfilaments effects of cadmium on 277
Microtitre plates in crystal violet staining method for cytotoxicity testing 317
Microtubules effects of cadmium on, modulation by calmodulin 227
Mixtures of chlorinated aliphatic hydrocarbons, toxicity in rat hepatocytes and *in vivo* 137 . . . of pesticides, effect on neural cells from foetal rat brain 123
MTT cleavage activity in monolayer cells, effects of mycotoxins on 311
Mycotoxins Fusarium, effects on MTT cleavage activity of monolayer cells 311 . . . T-2 toxin turnover in bovine platelet 175

Neurotoxicology model systems, meeting report 159
Nitrosamines and neuroendocrine lung cancer 37

Organ cultures in human risk assessment 69
Organophosphorus pesticides effects on cholinesterase activity in rat brain 111, 123
Ovary cells Chinese hamster, effects of amoxapine on 285
Oxamyl and inhibition of rat plasma cholinesterase 91
Oxidants phorbol ester-induced generation in murine epidermal cells 195

Paracetamol inhibition of DNA synthesis by 13
Paraquat genotoxic effects in mammalian cells 53
Peroxisomes identification in rat embryo 245 . . . inducibility in rat embryo 253
Pesticides effect on neural cells from foetal rat brain 111
***N*-Phenyl-*p*-phenylenediamine** uptake onto collagen in skin irritation 323
Phorbols ester-induced oxidant generation in murine epidermal cells 195 . . . esters of, interaction with copper sulphate in mouse skin cells 293
Phospholipids turnover in bovine platelet, effect of T-2 toxin 175
Phthalate esters effects of MEHP on Sertoli cell metabolism 77
Platelets bovine, effects of T-2 toxin on phospholipid turnover in 175
Polychlorinated biphenyls effects of 2,2′,4,4′,5,5′-hexachlorobiphenyl on testosterone production 33
Propranolol effect on collagen synthesis in rat lung interstitial fibroblasts 129
Protein(s) content in Hep G2 cells after exposure to chemicals 189 . . . kinase C, mediation of phorbol ester-induced oxidant generation in murine epidermal cells 195 . . . phosphorylation in rat glia, calcium regulated, effect of toluene treatment 235 . . . synthesis in rat liver, effect of ethanol and nutritional status 7
Protozoans membrane-stabilizing activity by drugs in 181

Quantitative structure–activity relationships meeting report 351

Reproductive toxicology meeting report 241
Risk assessment using organ cultures 69

Saccharin cytotoxicity in rat bladder epithelial cell line 201
Saponins effects on rat small intestine 85
SK&F 95018 and haemolysis in human erythrocytes 299
Skin irritation, *N*-phenyl-*p*-phenylenediamine uptake onto collagen 323 . . . mouse, antioxidant effects of copper sulphate on phorbol ester in 293 . . . mouse and human, benzo[*a*]pyrene-DNA adducts in 69 . . . mouse, phorbol ester-induced oxidant generation in 195

T-2 toxin effect on phospholipid turnover in bovine platelet 175
Testes effects of phthalate monoesters on Sertoli cell metabolism 77 . . . rat, effects of cadmium on 215
Testosterone effects of PCBs on 33
Tobacco amines and nitrosamines in, and neuroendocrine lung cancer 37
Toluene and calcium regulated protein phosphorylation in rat glia 235
Toxicity correlation of chlorinated aliphatics *in vivo* and *in vitro* 145

Vancomycin cardiotoxicity in isolated working rat heart 27
Variation species differences in hepatocyte activation of 2-acetylaminofluorene 45

Yeast effects of amoxapine on 285

Zearalenone effects on MTT cleavage activity of monolayer cells 311
Zinc effect on interaction between cadmium and rat testicular cells 215

TOXICOLOGY IN VITRO

Aims and Scope

Toxicology in Vitro will publish original research papers and occasional reviews on the use of *in vitro* techniques for determining the toxic effects of chemicals and elucidating their mechanisms of action. The Journal will encourage the submission of studies which, by utilizing cell or tissue culture, perfused organs, tissue slices, isolated cells or subcellular fractions, including enzymes and cell-receptors, investigate the mechanisms of toxic effects encountered *in vivo* or better characterize the relationship between *in vitro* and *in vivo* observations. All aspects of toxicology will be covered, including specific organ toxicity (e.g. neurotoxicity, nephrotoxicity), various toxic phenomena such as carcinogenesis or teratogenesis, and the development, characterization and validation of new *in vitro* models for the assessment and study of toxicity. The Journal's editorial policy will be firmly rooted in the need for high-quality science in support of health or safety decisions, and emphasis will be placed on results that facilitate evaluation of the hazard of chemicals to man and animals.

Instructions to Authors

General Information

The Journal's main purpose will be the publication of **papers** reporting and interpreting original toxicological research involving the application or development of *in vitro* techniques. **Brief Communications** documenting important new findings warranting expeditious publication will also be considered, as will concise interpretative **reviews** of toxicological topics of contemporary significance. **Letters to the Editor** will be limited to comments on contributions already published in the Journal; if a letter is accepted, a response (for simultaneous publication) will be invited from the authors of the original contribution.

Submission of a paper will be held to imply that it reports original unpublished research, that it is not under consideration for publication elsewhere and that, if accepted for *Toxicology in Vitro*, it will not be published again, either in English or in any other language, without the Editors' consent.

Three copies of the manuscript should be submitted to one of the following Editors:

GORDON C. HARD, *BIBRA, MRC Toxicology Unit, Carshalton, Surrey SM5 4EF, UK*
I. F. H. PURCHASE, *Central Toxicology Laboratory, Imperial Chemical Industries plc, Alderley Park, Macclesfield, Cheshire SK10 4TJ, UK*
J. CARL BARRETT, *Laboratory of Molecular Carcinogenesis, National Institute of Environmental Health Sciences, P.O. Box 12233, Research Triangle Park, NC 27709, USA*

Manuscript Format

Sheets should be typed on *one side of the paper only* and *double spaced* throughout, with at least 2.5-cm margins. All pages must be numbered, including the *Title Page*, which should carry the title of the paper, the surnames and initials of the authors, the names and addresses of the institutions where the work was done (with the affiliation of each author clearly indicated) and a short running title not exceeding 45 letters and spaces. Titles consisting of declarative or interrogative sentences are not acceptable. Provision of telephone, Telex and/or Fax numbers will assist the processing of contributions.
Manuscripts of original papers should be organized into the following sections, each commencing on a separate sheet:
Abstract—a self-contained summary of the objectives, results and significance of the study, not exceeding 200 words. Uninformative sentences such as "the significance of the results is discussed" are not acceptable.
Introduction—a concise and clear statement on the background, purposes and significance of the work.
Materials and methods—a detailed description of the experimental design and of any new or improved methods. Well-established methods and techniques may be identified by reference only.
Results—presented concisely with the aid of tables or figures where appropriate. Duplication between this section and the Discussion must be avoided.
Discussion—a succinct interpretation of the data. Extensive literature reviews and highly speculative comment are discouraged.
Acknowledgements—providing recognition of sources of funding and donations of materials, and including any thanks the authors may wish to accord for advisory, technical or other assistance, since authorship should be limited to those who have made a major contribution to the study and to the preparation of the paper. Authors are advised to obtain approval for the wording of any acknowledgement from those whose help is noted.
References—listed in alphabetical order and including the names of all authors of the cited work. References to published papers should provide authors' names and initials, year of publication, full title of the paper, title of the journal (in full, or abbreviated according to the rules adopted in the "World List of Scientific Periodicals 1963", Butterworth & Co., London), volume number, and the first and last page numbers of the paper:

e.g. Wright A., Cowie H., Gormley I. P. & Davies J. M. G. (1986). The *in vitro* cytotoxicity of asbestos fibres: 1. P388D$_1$ cells. *Am. J. ind. Med.* **9**, 371–384.

References to books should include authors' names and initials, year of publication, title, edition, appropriate page number(s) and name and location of the publisher:

e.g. Foussereau J., Benezra C. & Maibach M. (1982). *Occupational Contact Dermatitis. Clinical and Chemical Aspects.* p. 277. Munksgaard, Copenhagen.

For multi-author books, the names and initials of the relevant authors, year of publication, title of the relevant chapter, title of the book, names and initials of all editors, numbers of first and last pages of the cited chapter and name and location of the publisher should be given:

e.g. Mather J. P. & Phillips D. M. (1984). Primary culture of testicular somatic cells. In *Methods for Serum-free Culture of Cells of the Endocrine System.* Edited by D. W. Barnes, D. A. Sirbasku & G. H. Sato. pp. 29–45. Alan R. Liss, New York.

Citations of references in the text should give the surname(s) of the author(s), together with the year of publication. For references with more than two authors, the name of the first followed by *et al.* should be cited. For papers with the same author(s) and year, the references should be distinguished in the text and reference list by the letters a, b etc. following the year. Authors names must not be typed in upper case letters in either text or reference list.
References may be listed if they are 'in press', but the journal that has accepted the paper for publication must be identified. Submitted papers or papers in preparation should not be listed; such work should be mentioned in the text only, as 'unpublished data' or 'personal communication' (with surnames and initials).

These sections should be followed by the tables in numerical order, each on a separate sheet, and finally by a typed list of the legends to the figures (see below).

Tables and Figures

These should be intelligible without reference to the text and should be planned to fit the page size of the Journal. Tables and figures should be numbered, in arabic numerals, in the sequence in which they are mentioned in the text. The same data may not be reproduced in both a table and a figure. Each table must have a title and on each column there should be a heading that clearly identifies the data therein. Illustrations and diagrams should be kept to a minimum; the figure number must appear only on the reverse side, together with the author's name and an arrow marking the top. Three copies of any half-tones (unmounted and on glossy paper) are required; for line drawings, an original (in black drawing ink on good quality paper) or a glossy print is required for reproduction, together with two clear photocopies for the referees. No information that can be included in the legend should appear on the figure and the following standard symbols are preferred for line drawings: ■ □ ● ○ ⊙ × ◇. The legends for photomicrographs must state the staining method and magnification. Authors should bear in mind that the figures they submit may be subjected to photographic reduction. The cost for illustrations in colour will be the responsibility of the contributor(s) (an estimate may be obtained from the Editorial Office at BIBRA).
If figures that have already been published under copyright are to be reproduced in the Journal (e.g. in reviews), copies of letters from the first publisher and the original author giving permission for such reproduction must accompany the submitted manuscript.

Footnotes

These should include the definitions of any abbreviations used in the text and any author's current address, if different from that on the title page. Other footnotes, as distinct from literature references, should be avoided in the text as far as possible. When they are essential, they should be identified by the symbols * † ‡ § ‖ ¶, in that order. All the footnotes except those for tables should be typed on a separate sheet, with an indication of the manuscript page to which the footnote refers.

Nomenclature

The metric system is the standard for all measurements. Test chemicals and enzymes must be clearly identified, wherever possible with the aid of CAS Registry and EC numbers.

Abbreviations

These should be used sparingly; they should be defined when first used in the paper but also listed in alphabetical order under *Abbreviations* as a footnote to the title page (see above).

Page proofs

These will be sent to the first-named author for correction unless an alternative recipient is named on the submitted manuscript. They should be returned (by Airmail) to the Editorial Office within 48 hours.

Reprints

A reprint order form will accompany the page proofs. This must be returned to the Editorial Office with the proofs. No payment should be included with the order as an invoice will be sent later.

Printed in Great Britain by BPCC Wheatons Ltd, Exeter **800**
